

Kimball[®] Electronics

Kimball Electronics, founded in 1961 and became an independent, publicly traded company (Nasdaq:KE) in 2014. Kimball specializes in durable electronics and contract manufacturing for non-electronic components, medical disposables, drug delivery solutions, and precision molded plastics. We offer award-winning service with a global reach and rely on our robust processes, standardization, and teamwork. Our Customer Relationship Management model ensures easy access to our services throughout the product life cycle. Customers depend on our quality, certifications, financial stability, and commitment to longterm relationships in industries with rigorous engineering controls and long product life cycles.

END-TO-END PARTNERSHIP SOLUTIONS

DESIGN & DEVELOPMENT

Integrated design and manufacturing services
Increases speed to market

PROTOTYPING

Dedicated team & equipment
Bring products to market faster
