

MEDICAL ELECTRONICS

WHERE IT ALL BEGAN.
WHERE WE CONTINUE
TO EXCEL.

By definition, “Medical Electronics” includes electronic instruments and devices used for diagnosing and curing diseases and managing the health and wellness of patients.

We are committed to bringing life-saving and life-improving products to market for our Medical customers. Since 1999, we have offered electronics design, electronics assembly manufacturing, and focused support to meet critical healthcare requirements. We have the experience and ability to provide the highest quality and highest reliability in Medical manufacturing.

We can help our customers speed to market with our experience. Kimball Medical Solutions offers strong regulatory and process development teams in order to focus on your New Product Introduction (NPI). We help to streamline activities that can lead to delayed product launches. From your first idea, to full-scale manufacturing, we can help. Your patient is our patient.
